re: OU 11 Final Work Plan

Dear Mr. Baughman:

The Work Plan submitted reflects a general improvement in understanding of the RI/FS and RFI/CMS processes and the role of this particular step in the overall site remediation process. The majority of issues and comments raised in previous meetings and reviews have been appropriately dealt with. However, several technical weaknesses, procedural questions, and internal contradictions remain, as described in the attached. EPA feels these should be addressed, through a procedure acceptable to CDH, before field work starts.

If you have any questions, please contact Bill Fraser at (303) 294-1081.

Sincerely,

Martin Hestmark
Rocky Flats Project Manager
